PROJECTS

Inventory Management System

MARCH- 2024

- To build an Inventory Management System (IMS) using HTML, CSS, JavaScript, React, and MongoDB, we will follow a structured approach. Below, I'll outline the key steps and provide sample code snippets to get you started. This system will include basic functionalities such as stock level monitoring, order management, and reporting.

Quiz app

AUGUST-2023

- Creating an engaging and interactive quiz application using HTML, CSS, and JavaScript involves multiple steps. Below, I'll guide you through setting up a basic quiz app that supports multiple question types, timed quizzes, and score tracking.

Tamil Speech to Sign Language Animated Video

APRIL- 2025

- A real-time Tamil Speech-to-Sign Language Translator using Python, PyAudio, Google APIs, NLP tools, and Stable Diffusion to generate animated sign language for the hearing and speech impaired. It also supports subtitle display for improved accessibility.
